

# Peer Graded Assignment: R Markdown and Leaflet

Colleen

4/25/2022

## Instructions

Create a web page using R Markdown that features a map created with Leaflet.

Host your webpage on either GitHub Pages, RPods, or NeoCities.

Your webpage must contain the date that you created the document, and it must contain a map created with Leaflet. We would love to see you show off your creativity!

## Installing Packages and opening Leaflet

```
library(leaflet)
```

## Create Map with Marker

```
Colleens_map <- leaflet() %>%  
  addTiles() %>%  
  addMarkers(lng=-121.995913, lat=38.29354, popup="Best Coffee in NorCal")
```

## Print your map

```
Colleens_map
```
